

If $0 \leq k < \frac{\pi}{2}$ and the area under the curve $y = \cos x$ from $x = k$ to $x = \frac{\pi}{2}$ is 0.1, then $k =$

(A) 1.471

(B) 1.414

(C) 1.277

(D) 1.120

(E) 0.436

$$\int_k^{\pi/2} \cos x \, dx = .1$$

$$\sin x \Big|_k^{\pi/2} = .1$$

$$\sin \pi/2 - \sin k = .1$$

$$\sin \pi/2 - .1 = \sin k$$

$$1 - .1 = \sin k$$

$$.9 = \sin k$$

$$k = \sin^{-1}(.9) \approx 1.120$$

7-3 Day 2 Volumes : Washers Method

Learning Targets

I find the volume of a solid that has been rotated around an axis using the washer method.

Ex1. The region in the first quadrant enclosed by the graphs of $f(x) = 4\sin\left(\frac{x}{2}\right)$ and $g(x) = \frac{x}{2}$ is revolved around the x-axis to form a solid. Find the volume.

$$A = \pi R^2 - \pi r^2$$

$$R = 4\sin\left(\frac{x}{2}\right)$$

$$r = \left(\frac{x}{2}\right)$$

$$A = \pi \left(4\sin\left(\frac{x}{2}\right)\right)^2 - \pi \left(\frac{x}{2}\right)^2$$

$$4.9491536$$

$$\int_0^A \pi \left(4\sin\left(\frac{x}{2}\right)\right)^2 - \pi \left(\frac{x}{2}\right)^2 dx$$

$$\approx \boxed{117.081} \text{ u}^3$$

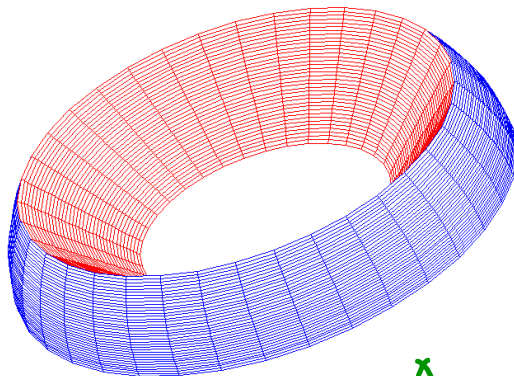

Ex2. The region in the first quadrant enclosed by the y-axis and the graphs of $y = \cos x$ and $y = x$ is revolved around the line $y = -1$ to form a solid. Find the volume.

$$R = \cos x + 1$$

$$r = x + 1$$

$$A = \pi \left((\cos x + 1)^2 - (x + 1)^2 \right)$$

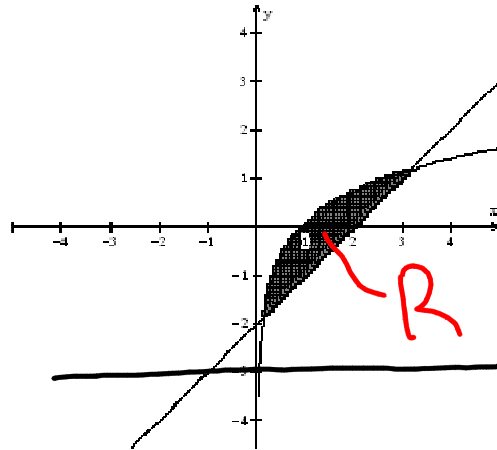

$$V = \pi \int_0^{.73908513} (\cos x + 1)^2 - (x + 1)^2 dx$$

$$\approx 1.285\pi$$

$$\approx 4.036$$

Ex3. Let R be the shaded region bounded by the graph of $y = \ln x$ and the line $y = x - 2$ as shown.

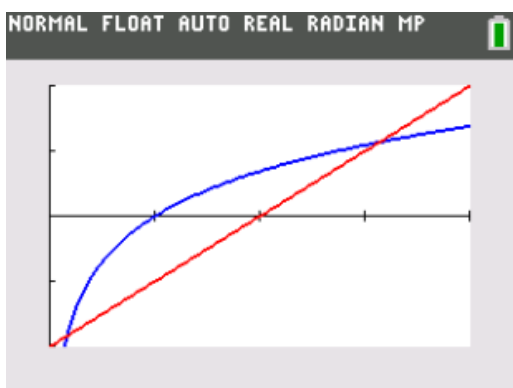

a.) Find the area of R .

b.) Find the volume of the solid when R is rotated around the horizontal line $y = -3$.

c.) Find the volume of the solid when R is rotated around the y -axis.

a.)

$$\int_A^B \ln x - (x-2) dx \approx 1.949$$

NORMAL FLOAT AUTO REAL RADIAN MP
 Ans→A
1585943396

NORMAL FLOAT AUTO REAL RADIAN MP
 Ans→B
3.146193221

b.)

$$R = \ln x + 3$$

$$r = (x-2) + 3$$

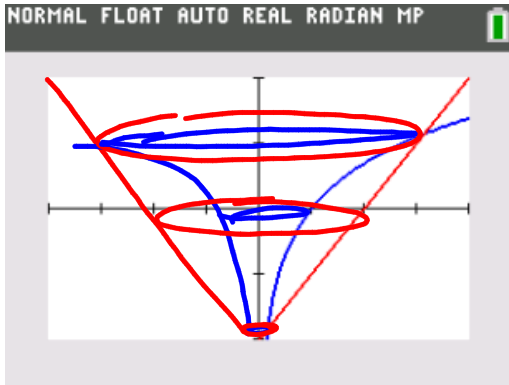

$$r = x + 1$$

$$= \pi \int_A^B (\ln x + 3)^2 - (x + 1)^2 dx$$

$$\approx 34.178$$

c.)

$$y = \ln x$$

$$x = e^y$$

$$y = x - 2$$

$$x = y + 2$$

1.14619

$$\pi \int_{-1.54406}^{1.14619} (y+2)^2 - (e^y)^2 dy$$

$$\approx \textcircled{17.099}$$
