### Scavenger Hunt: Unit 4 review

Start at 1 and find answer on another square. Do that question next.

$$y = kx \rightarrow k = \frac{y}{x}$$

Task Card 1

Answer: 3

An automobile travels 54 miles on 3 gallons of gasoline. At this rate, how many miles will it travel with 7 gallons of gasoline?

Task Card 2

Answer: 11.5

#### New Task:

The polygons are similar. Solve for x.

Task Card 3

Answer: B and F

What is the constant of proportionality?

Number of Cupcakes (x)	Cost (y)
4	\$16
5	\$20
7	\$28
8	\$32

Task Card 4

Answer: k= 9

David made a scale drawing of his family room. He used the scale 1.5 cm = 2 m. If the family room is 9 cm wide in the drawing, how wide is the actual family room?

Task Card 5

Answer: 6

What is the constant of proportionality?

A family of six paid \$54 for concert tickets and a family of 9 paid \$81 for the same tickets.

People (x)                      0    2    6    10

Total Cost (y)

Task Card 6

Answer: k= 4

Kevin measured the dimensions of his cabin property and made a scale drawing. The scale he used was 1 in = 4 yards. The actual length of his property is 46 yards. How long is his property in the drawing?

Task Card 7

Answer: 126

Which graphs which show proportional relationships.

Task Card 8

Answer: 12

What is the missing number?

x	y
2	3
5	
7	10.5
8	12
10	15
11	16.5
12	18

**Task Card 9**

Answer:  $y = 5x$

An train travels 425 miles every 5 hours. At this rate, how long with it take to travel 935 miles?

**Task Card 10**

Answer: **1.5**

**New Task:**

Use the diagram to answer the following questions.

What is the scale factor from Trapezoid A to Trapezoid B?

**Task Card 11**

Answer: 1/3

What is the missing number?

Hours	4	5	6	7	8
Pay	\$48		\$72	\$84	\$96

**Task Card 12**

Answer:  $y = 66x$

**New Task:**

What is the scale factor from A to B?

**Task Card 13**

Answer: 60

What is the equation?

On a trip to Wisconsin, your family drove 132 miles in 2 hours and 330 miles in 5 hours.

Hours (x)	0	1	2	4	5
Total Miles (y)					

**Task Card 14**

Answer: 11

What is the equation is represented by the situation on the graph?

x	y
1	
2	
0	
-1	
-2	

**Task Card 15**

Answer:  $y = -2x$

**New Task:**

What is the scale factor from A to B.

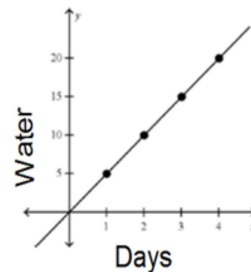

**Task Card 16**

Answer: 7.5

What is the equation is represented by the situation on the graph?

x	y
1	
2	
3	
4	
5	

**Task Card 17**

Answer: **0.2 or 1/5**

**New Task:**

The actual distance between two cities is 450 miles. The scale of the map is 1 in:150 miles. How far apart are they on the map?
